

EBOLA IN CONTEXT: UNDERSTANDING TRANSMISSION, RESPONSE AND CONTROL

WEEK 1 STEP 1.22 SUMMARY (ARTICLE)

We have now reached the end of the first week.

Next week we will look at control measures, in the community and in the Ebola Treatment Centres, and at why it is difficult to know what proportion of people with Ebola die. The activities are available to view now, but if you decide to review them early, you may want to return to the comments and discussions to see what other learners have thought and to continue contributing.

This material has been repackaged from a free, online course delivered by the London School of Hygiene and Tropical Medicine on the FutureLearn platform in 2015. Additional information about the course and its contributors can be found on [the School website](#).

Future iterations of the course may feature slightly different material. Further live runs of this and other courses can be found on the platform. Please visit the [School's FutureLearn webpage](#) for more details.
